

## DIN rail adaptor HSA

[www.kem.nt-rt.ru](http://www.kem.nt-rt.ru)

### Description

The DIN rail adaptors of the series HSA are for mounting units with panel mount housings on a DIN rail.

When using the adaptors, enough place is left between the housing and the DIN rail for the connecting cables.

### Operation

The complete set consists of 2 adaptors, 4 screws M2x12, 8 washers M2 and eventually 2 additional holders.

Turn the panel mount housing upside down and remove the 2 screws on one side of the back panel.

Fix 1 adaptor with 2 screws M2x12 and 4 washers (each 2 above and below the adaptor) to the housing.

Connect the second adaptor the same way.

Connect the cables and clip the adaptors on the DIN rail.

### Ordering Information

HSA72 for FAS100

HSA96 for KCE8000 / TCE8000
